INNOVATIVE SURGERY

## Söring – innovative surgery

Söring, one of the pioneers in ultrasound technology, has been offering innovative solutions for ultrasonic and HF surgery on the international market for more than two decades. Söring not only is the market leader in ultrasound technology but also offers one-of-the-kind solutions for non-contact coagulation. Söring's success hinges on the continuous and uncompromising search for innovative improvement, reliable product quality, the proverbial German thoroughness and the flexibility of adapting to the market requirements by providing tailor-made solutions. Innovative surgery – benefits for you and your patients.

### Ultrasound surgery: innovative, flexible and cost-effective

Many surgery techniques require that tissue is cut with great care and little bleeding. As ultrasound technology fully meets these demands, it is widely spread in all surgical disciplines.

Sonoca 300, an ultrasonic dissector by Söring GmbH (Medizintechnik, Quickborn, Germany) is the only unit worldwide offering three working frequencies in one (25 kHz, 35 kHz and 55 kHz), which makes it suitable for application in many disciplines. You can connect ultrasonic handpieces as well as ultrasonic scissors and hooks for cutting and coagulating to the unit.

# ULTRASOUND TECHNOLOGY - INNOVATIVE AND FUTURE-ORIENTED

## Application range:

- General surgery
- Gynaecology/oncology
- Heart surgery
- ENT
- Minimally invasive surgery
- Neurosurgery
- Urology
- Wound Treatment

- 3 working frequencies in one compact unit
- Controlled tissue dissection (25 / 35 kHz) while preserving nerves, blood vessels and collagen structures
- Cutting and coagulation effects (55 kHz) on the tissue with special ultrasonic instruments
- Unit works simultaneously with integrated aspiration and irrigation
- The "SONOCA®" is processor-controlled and features automatic instrument detection with automatic preselection of power parameters

## MULTIFUNCTIONAL AND INTERDISCIPLINARY APPLICABLE

Sonoca 300 can be used in conjunction with the HF unit MBC 601 UAM.

Combination instruments allows you to cut tissue and stop bleeding at the same time.
